LN D/FBIS

Manning, Cw.

EXCERPT FROM AD/FBIS DAILY LOG - 12 MARCH 1980

BRIEFING OF [] At the regular biweekly meeting with ADDS&T [] I recapped this morning's meeting with Keith Hall, OMB. I noted that Keith Hall had no problem with relating our Muslim World Action Plan to its objective, but he felt we might have difficulty in implementing two aspects: (1) he felt the DR automation plan was cramming too much into this; and (2) he is concerned that with \$1.090 million tied up in Islamabad monitoring we might not get Pakistani approval. [] noted to Hall that even if we delete \$400,000 devoted to circuitry, we could do the remainder because it can be done with TDY Staff technicians assigned to the Embassy. [] went through our action plan with me and had no problems with it, although noting there are some tight deadlines. He supported the idea of a draft memo from Frank Carlucci to [] and suggested either [] about the space matter. He said he would help on that as well as the recruiting aspects, but recommended we talk directly with Fitzwater first. []

On other matters, I reviewed our contingency planning with regard to San Vito AFB and our problem with the Ivanoff "Presearch" report. He suggested that we try to get to [] and explain our reservations about the report. []

Taylor asked about [] between AG and NFAC. I said the tendency has been for [] to go to NFAC [] of the higher grade structure. (cc: C/E&PS, AC/AG, AC/Ops, [], C/AS) []
